

MEGAPATTERN by Donna Porter Poster

Here is a unique presentation of quilt designs, an entire "book" of designs in each pattern without the cost of a book. Each **MEGAPATTERN** contains four different designs all using the same cutting and sewing technique and the same shaped fabric pieces. Learn only one technique and you have 28 projects: crib, twin, double, queen, king, lap and wall hanging for each of the four designs in each pattern. This should keep you behind the sewing machine, and out of trouble, for quite some time.

Each Pattern Contains:

1. A color cover page which suggests fabric colors for each design.
2. General construction information page or pages showing in a general way how fabric is cut and the design constructed.
3. Project pages for the four designs containing yardages for each fabric, project sizes, cutting details, number of each fabric needed, number of blocks needed (across and down), units needed and a detailed sewing plan.
4. There are six to ten project pages, depending on the design.
